BEFORE THIS Span ran the pipelines on a copy, the September figures matched the certified ones, and they went live on 10 Oct. Step 4 opened for you.

Lumen
Builds views from verified tables only

MEI CHEN
Show September for the liquid portfolio against the family benchmark, and what drove it.

LUMEN
Done. Three tiles from verified tables: portfolio 4.17% against the benchmark 2.71%, ahead by 1.46 points, then the benchmark mix and the two largest contributors.

MEI CHEN
The council always asks about limits. Add that too.

LUMEN
Added. Harborview Semiconductor is over its 5% limit by 308,000. Cedarpoint Ventures shows over 55%, but that is from old valuations, so I marked it as not a real breach.

LUMEN
One slot is open. A split of the lead into mix and holdings is not in the standard widgets. I can send it to the data team as a special request.

What Lumen checked

- ✓ Figures match the certified September numbers
  4.17%, 2.71% and 1.46 points, the same as the certified report
- ✓ Every tile names where it comes from
  Monthly benchmark, monthly holdings and monthly valuations tables
- ✓ The benchmark is the approved definition
  Version 1, approved by Raj Patel, used from 1 Jan 2026
- ✓ Leo's widget passed the data team's review
  Reviewed by Anita Rao on 13 Oct
- ✓ Readers are the people on the project
  Daniel Foo, Raj Patel, Sofia Reyes, Mei Chen

A new benchmark definition, version 2, is still being agreed. September uses version 1. Lumen will ask again when version 2 is approved.
