MORNING NOTE · FRIDAY 9 OCTOBER 2026 · 07:00 SINGAPORE

The office is worth 57.78 million, 180,000 more than September's report said.

Fund A's manager sent its final statement after the report went out. The liquid book beat its benchmark by 1.46 points in September. Two items need you before noon: a revision over your threshold and a limit breach.

Lumen wrote this note from last night's run: 9 funds, 20 securities, cash for 3 entities, checked by Tally at 06:02. Report issued 3 Oct, signed by Raj Patel.

Accept Fund A's final statement into the September report

Evergreen Growth I came in at 10,180,000 against the 10,000,000 estimate. +180,000 is over your 100,000 threshold, so the report waits for you.

@Lumen is the Fund A revision in the council pack yet? And what does it do to the SGD total?

Lumen APP 07:43

Not yet. The Q3 council pack (draft 3) still uses Fund A's 10,000,000 estimate. The final statement says 10,180,000, so the September total moves from 57,600,000 to 57,780,000 USD. At the 30 Sep fixing that is 241,416.00 more in SGD. The revision is over the 100,000 threshold, so it waits for Daniel Foo to accept it; then the report goes to version 2 for your signature.
